

FAD FOAMING ACID DISINFECTANT

PRODUCT USES

A ready-to-use, acid-based product created to have high foaming action. For daily maintenance of showers, restrooms, locker rooms and any other area with similar surfaces.

OPERATOR BENEFITS

Can be used on a wide range of surfaces such as tile walls, toilets, urinals, chrome, and other acid-resistant surfaces.

DIRECTIONS FOR USE

FOR GENERAL DISINFECTION: For heavily soiled areas, a preliminary cleaning is required. For disinfecting hard, non-porous surfaces such as floors, walls, countertops, bathing areas, lavatories, tables, chairs, garbage pails and other hard, non-porous surfaces, apply FAD Foaming Acid Disinfectant with a brush, cloth, sponge, auto scrubber or foam gun or mechanical spray device, coarse pump or trigger spray device, thoroughly wetting surface. For sprayer applications, spray 6-8 inches from surface. Do not breathe spray. Rub with brush, cloth, or sponge. Allow surfaces to remain wet for 10 minutes. Wipe up excess liquid. Do not allow to dry on surface. Change cloth, sponge or towels frequently to avoid redeposition of soil. Replace product when it becomes visibly soiled.

PRODUCT SPECS

Pack size: 6/1 QT

Characteristics: Liquid

Rinsability: Excellent

Flammability: NA

Color: Orange

Odor: Lemon

Foam: Med to High

pH: 0.0 - 3.0
